Subject Fw: Tallassee WDC Chronological Summary - Additional
Information

Hi Phil,

Could you also send me a copy of the response ADEM received from the Attorney General in September 2000 stating that there is no statutory limitation on the length of time of a local approval once issued (see bullet 10 of Tallassee WDC timeline)? Thanks again.

Karen

Subject Re: Tallassee WDC Chronological Summary

Hi Phil,

Thanks again for the information. I only have two questions regarding the timeline you sent.

1. The 12th bullet on the first page indicates that comments from the Tallapoosa & Montgomery Commissions were received supporting the re-opening of the landfill. Were any comments received from the public? If so, can you send them to me?
2. The last two bullets on the same page refers to a public hearing and public comment period re: the major permit mod of the landfill. Were any public comments received before the public comment period ended on September 2, 2003? If so, please send them to me.

If you have any questions, please call or email me. I appreciate your assistance.

Subject Tallassee WDC Chronological Summary

Karen:

As requested, attached is a chronological summary of the Tallasse LF. As you may see, the old sanitary landfill began operation in the 1970's and closed in the early 1990's with the promulgation of RCRA Subtitle D. The new landfill originally received approval by the local host government in 1991, but a permit application was not submitted to ADEM until several years later.

In response to a question you asked this morning, the Tallasse WDC is located adjacent to the closed sanitary landfill.

I hope this information is useful. Please let me know if you have any further questions.

Phil Davis
